From funny videos to movies, we all watch and download videos of all kinds on our smartphones. Though, there aren't a lot of reliable sources or apps where we can download HD videos for free. If you are also not able to find the right HD video downloader for your device, then don't worry – as we have a perfect solution for you. Get to know about an ideal and freely available HD video downloader APK in this post.

## **Part 1. Get the Best HD Video Downloader App**

Snaptube is simply the best Android app to watch and do HD video free download. It is available for free and is compatible with all the leading Android devices out there. It has a sleek and easy to use interface, which has integrated numerous video sharing platforms. In this way, you can look for a video on different platforms in one place.

## **Part 2. How to Do Full HD Video Download**

Snaptube is compatible with all the leading Android devices and has a user-friendly interface. Therefore, you won't face any trouble using this HD video downloader app for Android. All you need to do is follow these steps:

### **Step 1: Download the Snaptube app on your device**

Firstly, you need to download the Snaptube app on your Android device. To do this, launch any web browser on your device and visit the official website of Snaptube.

From there, you can download the latest version of the app. Tap on the downloaded APK file and install the app on your device.

Beforehand, make sure that you are able to download apps from unknown sources on your phone. Visit your phone's Settings > Security and enable app installation from sources other than Google Play.

## **Step 2: Search for any HD video**

Whenever you wish to watch or download any video, simply launch the Snaptube app on your device. You can view a listing of the various platforms on the home page. Just tap on the platform where you wish to search for HD videos.

You can even add any other platform to this list as well. To do this, tap on the "More" option and manually add a platform.

Tap on the search bar and type any keyword to look for the video of your choice. You can search for movies, music videos, funny videos, TV shows, and so much more.

## **Step 3: Watch and download videos for free**

In no time, the application will display search results related to the provided keywords. You can simply browse through the interface to check the results. If you want to directly download the video, then tap on the download icon, which is located adjacent to the video thumbnail.

If you wish to watch a video first, then select it by tapping on the video thumbnail. This will start playing the video. You can save it by tapping on the download icon, located at the bottom of the video player.

The application will display different resolution options (and sizes) for the selected video. Simply tap on the resolution of your choice to download it on your device.

Wait for a while as the HD video would be downloaded on your phone. Later, you can find it in the "Downloads" folder of Snaptube or by visiting your device's file storage.

Great! Now when you know how to use this HD video downloader, you can easily get all the videos of your choice. Snaptube is a one-stop destination to download movies, TV shows, funny videos, and so much more. Go ahead and use this amazing HD video downloader right away and make the most of your Android device. Freely available, it is certainly a must-have app for every Android user out there.
